

ELEMENTUM PHYSICAL COPPER ETC

FACTSHEET

Elementum Physical Copper is designed to offer security holders a simple and cost-efficient way to access the copper market by providing a return equivalent to the movements in the copper spot price less the applicable Total Expense Ratio (TER). Elementum Physical Copper is backed by physical copper. Only metal that conforms with the London Metal Exchange's (LME) rules for Good Delivery can be accepted by the Custodian. The ETC securities (or "ETCs") are backed by exclusive title to a specific pool of physical copper held in a warehouse.

REPLICATION AND PRICING

Elementum Physical Copper ETCs are backed by a direct investment in the underlying physical copper. Authorised participants create and redeem Elementum Physical Copper ETC securities by delivering or receiving copper that conforms to LME Good Delivery standards. The issuer has direct and sole ownership of the copper, which is stored in secure warehouses in Rotterdam. Each physical ETC security entitles the holder to a specified quantity of copper (the "Metal Entitlement") of the segregated pool owned by the issuer. The value of the security is a function of the Metal Entitlement, the copper cash price and any applicable fees.

KEY ADVANTAGES

- Security: Metal held in secure LME warehouses and subject to independent audit twice a year
- Responsible Sourcing: LME approved and sourced metal and a commitment to the UN Sustainable Development Goals 2030
- Transparency: Data is digitally recorded on the blockchain
- Cost: Commitment to competitive pricing

POTENTIAL RISKS

- Value is at risk and a security holder may lose some or all of the amount invested
- The price of industrial metals may fluctuate and is dependent upon various factors, including supply and demand, and market liquidity
- Pricing on the secondary market may be at a discount or premium compared to the Cash Value per ETC security published by the Issuer
- Investors whose primary currency is not the US dollar are exposed to foreign exchange rate risk
